A non-profit environmental education organization that promotes and coordinates litter prevention programs and community cleanups, the primary goal being public education with the importance focused on waste reduction and the conservation of natural resources.

RECYCLING

If you haven't been recycling, now is the time to start. Support our community and anything that helps our environment and/or cuts down waste. Most importantly **REDUCE** the amount of waste or trash you have by buying products with less packaging and buying only those things you really need. **REUSE** products and the packaging that goes along with them. Fix or repair things instead of throwing them away. Buy used items instead of new. And of course, **RECYCLE!**
